Svalen LED Ditte

The Lamp series SVALEN is a combination of modern stylish design and the very latest LED technology with soft lighting.

Elegant design (just 12 mm high) and very low power consumption. The LEDs got a lifetime on 50 000 hours. The lamps got a nice, smooth brightness without annoying glare and the diodes side radiation gives a decorative light effect through the screen all the way to the edge, which completes the lamps light appearance.

The lamp screen is in clear acrylic. It's possible to engrave the screen with dramatic 3D effects. The lamp is delivered with silencer for stepless adjustment of the brightness.
